## RISK FACTORS

Investing in the VIPB Growth Fund (hereinafter the Fund) involves certain risks normally associated with making investments in securities. There can be no assurance that the Fund will achieve its investment objectives. The value of the Fund can fluctuate to increased or decreased level. On redemption, there is no assurance that the investors will receive the amount originally invested. The Fund is suitable for investment by investors who understand the risks involved and who are willing and able to survive the loss of their investments. In particular, prospective investors should consider the following risks.

### **General Risk**

There is no assurance that the Fund will be able to meet its investment objectives and investors could potentially incur losses, including loss of principal when investing in the Fund. Investment in the Fund is not guaranteed by any government agency, the Sponsor or the AMC. Mutual Funds and securities investments are subject to market risks and there can be no assurance or guarantee that the Fund's objectives will be achieved. As with any investment in securities, the Net Asset Value of the Fund may go up or down depending on the various factors and forces affecting the capital markets. Past performance of the Sponsors and their affiliates and the AMC do not indicate the future performance of the Fund. Investors should study this offer document carefully in its entirety before investing.

### **External Risk Factor**

Performance of the Fund is substantially dependent on the macroeconomic situation and in the capital market of Bangladesh. Political and social instability may have an adverse effect on the value of the Fund's assets. Adverse natural climatic condition may impact the performance of the Fund.

### **Market Risk**

Bangladesh capital market is highly volatile and prices of other securities can fluctuate significantly. The Fund may lose its value or incur a sizable loss on its investments due to such market volatility. Stock market trends indicate that prices of majority of all the listed securities move in unpredictable direction which may affect the value of the Fund. Furthermore, there is no guarantee that the market prices of the units of the Fund will fully reflect their underlying Net Asset Values.

### **Concentration Risk**

Due to the limited number of listed securities in both the stock exchanges (DSE and CSE), it may be difficult to invest the Fund's assets in a widely diversified portfolio as and when required to do so. Due to a very thin secondary fixed income/debt market in Bangladesh, it would be difficult for the Fund Manager to swap between asset classes, if and when required. Limited options in the money market instruments will narrow the opportunity of short term or temporary investments of the Fund which may adversely impact the returns.

### **Dividend Risk**

Despite careful investment selection of companies in the Fund, if the companies fail to provide the expected dividend or fail to disburse dividends declared in a timely manner that will impact the income and the overall return of the Fund.

### **Underlying Liquidity Risk**

For investing in Pre-Public Offer Placement securities i.e. in the unlisted equity securities by the Fund, may involve liquidity risk. In addition, market conditions and investment allocation may have an impact on the ability to sell securities during periods of market volatility. Debt securities, while somewhat less liquid, lack a well-developed secondary market, which may restrict the selling ability of the Fund, and may lead to the Fund incurring losses till the security is finally sold. While securities listed on the stock exchange

carry lower liquidity risk, the ability to sell these investments is limited by the overall trading volume on the stock exchanges and may lead to the Fund incurring losses till the security is finally sold.

### **Investment Strategy Risk**

Since the Fund will be an actively managed portfolio, the Fund is subject to management strategy risk. Although the AMC will apply its investment process and risk minimization techniques, when making investment decisions for the Fund, there can be no guarantee that such process and techniques will produce the desired outcome.

### **Credit Risk**

Since the Fund will seek to invest as per the Mutual Fund Regulations (2001) in both equity and fixed income securities, the credit risk of the fixed income issuers is also associated with the Fund. Investment in fixed income securities is subject to the risk of an issuer's inability to meet interest and principal payments on its obligations and market perception of the creditworthiness of the issuer.

### **Interest Rate Risk**

The Net Asset Value (NAV) of the Fund is expected to increase consequent upon a fall in interest rate while it is supposed to fall with a rise in the interest rate to the extent it is invested in Debt and Money Market securities. Also, zero coupon securities do not provide periodic interest payments to the holders and hence these are more sensitive to changes in interest rates. So, if the Fund Manager opts for investing in zero coupon securities offering attractive yields that would increase the risk of the portfolio also.

### **Issuer Risk**

In addition to market and price risk, value of an individual security can, in addition, be subject to factors unique or specific to the issuer, including but not limited to management malfeasance, lack of accounting transparency, management performance, and management decision to take on financial leverage. Such risk can develop in an unpredictable fashion and can only be partially mitigated, and sometimes not at all, through research or due diligence. To the degree that the Fund is exposed to a security whose value declines due to issuer risk, the fund's value may be impaired.

### 2.1 Preamble to Formation of VIPB Growth Fund

Open-ended mutual fund is widely popular throughout the world among all kinds of investors. It is highly accepted and praised investment vehicle offering a lot more flexibilities to the investors. Globally at present, most of the mutual funds are open-ended ones. The scenario in Bangladesh has changed a lot over the last couple of years as a good number of open-ended funds were launched. At present there are 32 open-ended mutual funds (as of December, 2017) operational in the market. More funds are in the pipeline waiting to get the approval from the regulators.

VIPB Asset Management, one of the leading asset management firm in the country, launched its first open-ended fund named VIPB Accelerated Income Unit Fund in 2016. The fund got tremendous response from both individual and institutional investors. The fund was the best performer in 2017 among all mutual funds operational in Bangladesh. This sort of performance record isn't new for VIPB Asset Management. Even when the market went through a critical time since the market crash of 2010-11, the company continued to show robust performance in managing its two closed end mutual funds. That successful track record inspired the company to launch an open-ended mutual fund and eventually the fund carried the success story further. VIPB Asset Management Company Limited believes that it would be able to perform similarly in case of the proposed VIPB Growth Fund as well.

The parties to the fund are: VIPB Asset Management Company Limited as the Sponsor & the Asset Manager, Sandhani Life Insurance Company Limited as the Trustee and BRAC Bank Limited as the Custodian of the Fund.

### 2.2 Advantages of Investing in VIPB Growth Fund

Generally, investment in mutual funds provides certain incremental advantages when compared to investment made directly in the capital market. Highlighted below are some of the advantages the investors may benefit from when investing in VIPB Growth Fund:

- ▶ Mutual funds generally lower investment risks for small and retail investors through diversification into multiple sectors, companies, securities, and via investing in various asset classes. The fund manager will attempt to maximize return for a given level of risk and always conduct a balance in its risk-return tradeoff.
- ▶ Mutual funds through its diversified pool of investments will provide small investors access to returns of the wider market, which will be very costly for retail investors to achieve individually.
- ▶ Greater participation of mutual funds will add to enhanced liquidity to the overall market and, since most mutual funds are long term investment vehicles, this will create price stability and better price discovery and reduce short term volatility in the market.
- ▶ The Fund's performance will benefit from the VIPB Asset Management Company Limited proprietary investment process and research tools for both fundamental and technical analysis; AMC has a highly skilled in-house research team who are experienced investment professionals dedicated to research the stock market, its scripts and the impact of the broader macro-economic factors that impact the market. In Bangladesh, mutual funds enjoy a 10% (ten percent) reserved quota for all Initial Public Offerings (IPOs). IPOs in Bangladesh have historically performed very well relative to the market index and have positively contributed to mutual fund performance.

- ▶ The investors will be able to save significantly in transaction costs as he/she will have access to a large number of securities by purchasing a single unit of the mutual fund.
- ▶ Dividend income will be tax free up to Taka 25,000 as permitted under the Finance Act.
- ▶ Investment in the Fund will qualify for investment tax credit under section 44(2) of the Income Tax Ordinance 1984.
- ▶ Management and operations of mutual funds are subject to strict regulations from the BSEC and the Sponsor appointed Trustee, both of whom closely monitor the performance of the fund. The laws governing mutual funds require exhaustive disclosure to the regulator and general public.
- ▶ VIPB Growth Fund offers the investors to choose between receiving cash dividends and cumulative investment plan (CIP). The latter allows the fund manager to reinvest the dividend in the market.
- ▶ Price of the Units of the fund won't be determined by demand and supply, rather by Net Asset Value (NAV).

## CHAPTER 4: RISK FACTORS

Investing in the VIPB Growth Fund (hereinafter the Fund) involves certain risks normally associated with making investments in securities. There can be no assurance that the Fund will achieve its investment objectives. The value of the Fund can fluctuate to increased or decreased level. On redemption, there is no assurance that the investors will receive the amount originally invested. The Fund is suitable for investment by investors who understand the risks involved and who are willing and able to survive the loss of their investments. In particular, prospective investors should consider the following risks.

### **General Risk**

There is no assurance that the Fund will be able to meet its investment objectives and investors could potentially incur losses, including loss of principal when investing in the Fund. Investment in the Fund is not guaranteed by any government agency, the Sponsor or the AMC. Mutual Funds and securities investments are subject to market risks and there can be no assurance or guarantee that the Fund's objectives will be achieved. As with any investment in securities, the Net Asset Value of the Fund may go up or down depending on the various factors and forces affecting the capital markets. Past performance of the Sponsors and their affiliates and the AMC do not indicate the future performance of the Fund. Investors should study this offer document carefully in its entirety before investing.

### **External Risk Factor**

Performance of the Fund is substantially dependent on the macroeconomic situation and in the capital market of Bangladesh. Political and social instability may have an adverse effect on the value of the Fund's assets. Adverse natural climatic condition may impact the performance of the Fund.

### **Market Risk**

Bangladesh capital market is highly volatile and prices of other securities can fluctuate significantly. The Fund may lose its value or incur a sizable loss on its investments due to such market volatility. Stock market trends indicate that prices of majority of all the listed securities move in unpredictable direction which may affect the value of the Fund. Furthermore, there is no guarantee that the market prices of the units of the Fund will fully reflect their underlying Net Asset Values.

### **Concentration Risk**

Due to the limited number of listed securities in both the stock exchanges (DSE and CSE), it may be difficult to invest the Fund's assets in a widely diversified portfolio as and when required to do so. Due to a very thin secondary fixed income/debt market in Bangladesh, it would be difficult for the Fund Manager to swap between asset classes, if and when required. Limited options in the money market instruments will narrow the opportunity of short term or temporary investments of the Fund which may adversely impact the returns.

### **Dividend Risk**

Despite careful investment selection of companies in the Fund, if the companies fail to provide the expected dividend or fail to disburse dividends declared in a timely manner that will impact the income and the overall return of the Fund.

### **Underlying Liquidity Risk**

For investing in Pre-Public Offer Placement securities i.e. in the unlisted equity securities by the Fund, may involve liquidity risk. In addition, market conditions and investment allocation may have an impact on the ability to sell securities during periods of market volatility. Debt securities, while somewhat less liquid, lack a well-developed secondary market, which may restrict the selling ability of the Fund, and may lead to the Fund incurring losses till the security is finally sold. While securities listed on the stock exchange

carry lower liquidity risk, the ability to sell these investments is limited by the overall trading volume on the stock exchanges and may lead to the Fund incurring losses till the security is finally sold.

#### **Investment Strategy Risk**

Since the Fund will be an actively managed portfolio, the Fund is subject to management strategy risk. Although the AMC will apply its investment process and risk minimization techniques, when making investment decisions for the Fund, there can be no guarantee that such process and techniques will produce the desired outcome.

#### **Credit Risk**

Since the Fund will seek to invest as per the Mutual Fund Regulations (2001) in both equity and fixed income securities, the credit risk of the fixed income issuers is also associated with the Fund. Investment in fixed income securities is subject to the risk of an issuer's inability to meet interest and principal payments on its obligations and market perception of the creditworthiness of the issuer.

#### **Interest Rate Risk**

The Net Asset Value (NAV) of the Fund is expected to increase consequent upon a fall in interest rate while it is supposed to fall with a rise in the interest rate to the extent it is invested in Debt and Money Market securities. Also, zero coupon securities do not provide periodic interest payments to the holders and hence these are more sensitive to changes in interest rates. So, if the Fund Manager opts for investing in zero coupon securities offering attractive yields that would increase the risk of the portfolio also.

#### **Issuer Risk**

In addition to market and price risk, value of an individual security can, in addition, be subject to factors unique or specific to the issuer, including but not limited to management malfeasance, lack of accounting transparency, management performance, and management decision to take on financial leverage. Such risk can develop in an unpredictable fashion and can only be partially mitigated, and sometimes not at all, through research or due diligence. To the degree that the Fund is exposed to a security whose value declines due to issuer risk, the fund's value may be impaired.
